February, 2014

Association of "Children of the Holocaust" in Poland is a non-profit organization whose purposes of activity are: preserving the memory of the Shoah, fighting against the anti-Semitism and xenophobia and carrying out the educational program on the Holocaust. Among us are the last eye-witnesses of the crimes committed against the Jewish people, so their recollections represent a priceless document of those terrible times. Our association has already published five successive volumes of memories of our members, Jews who in 1940 – 1945 were children and who were in ghettos, concentration camps and in hiding.

The donations and grants that we have received up till now have enabled us to publish only Polish editions of these books. For these unique and important memoirs to be available to a wider audience the English editions are needed.

The fact that the books are only in Polish significantly restricts their accessibility to Polish speaking readers. The contemporary generations, especially outside Poland, even do not know what the Holocaust was or know about it very little. The shortage of knowledge about such cruel period of history can create favorable conditions for revival of the fascist ideology. The power of those books lies in the fact that they are not fiction but documentary reflection of the real life-stories.

It is important that content of the memoirs could reach the wider audience from outside the Polish language area.

The cost of translating and printing of one volume is approximately PLN 75.000 (\$ 25.000, € 18.500). We do not have the funds available for this, nor are we able to obtain it from Polish sponsors. It is why we are asking you about the help.

Please, contribute to our translation project. It will enable us to disseminate the understanding of the Holocaust all over the world.
